📞 +216 58 075 052   🚗 Motorized   🏠 Sidi Daoud Marsa

SKILLS

WEB DEVELOPMENT
Html, css, php, javascript, symfony

OBJECT-ORIENTED PROGRAMMING
C, Java, C++, Python

VERSION CONTROL
Git and Github

NETWORK AND SECURITY
Cisco Paquet Tracer, Linux

Learning:
Selenuim,Flask,Flutter,Dart,
Spring boot,react js and node js

Langues

Arabic

Anglais

Français

Professional experience

DEVELOPED A DESKTOP APPLICATION
Lead a group of five to do so:
- We develop a desktop application called 'Chargi' with a focus on the theme 'Smart Electric Charging Station.' Our application is designed to efficiently manage employees, cars, sessions, and maintenance tasks."
- We passed the first phase of the " Ball Event' project".

DEVELOPED A 2D GAME
I was the one charged to do the integration
- I undertook the responsibility of integration. Bringing together diverse elements of the game, my role involved harmonizing graphics, gameplay mechanics, and sound effects to create a seamless and immersive gaming experience.

DEVELOPED A WEBSITE
I was responsible for authentication
- My role took center stage as I spearheaded both authentication and integration aspects.
- I ensured a secure and dynamic authentifaction system connected to the data base,featuring distinct access points for administrators and simple user each tailored to meet their specific needs.
- My approach aimed to strike a balance between robust security measures and a user-centric design.
